SURFACE PROTECTION SYSTEM

## minimize rutting and turf damage

Without **GEORUNNER®** System:  
Typical rutting and turf damage

With **GEORUNNER®** System:  
Protection to turf and underlying soils

The **GEORUNNER®** surface protection system is ideal for minimizing soil compaction and turf damage caused by concentrated light-to-medium loads from

vehicles and foot traffic. While excellent for temporary use, the system also can be used for permanent, light-weight applications.

### benefits

- Minimizes soil damage/protects turf from temporary light-weight construction or delivery vehicle access
- Protects turf and soils from concentrated pedestrian foot traffic
- Reduces mud tracking from construction site entrances
- Creates a bridge over sandy areas for light-weight access of vehicles, wheel chairs, or foot traffic
- High percent open area allows sunlight and water to permeate, maintaining healthy turf
- Offers benefits over plywood; is easily cleaned for multiple uses and doesn't absorb water and soil
- Light-weight manageable size offers quick and easy transportation between jobs and compact storage

creating  
sustainable  
environments™

## specifications

<b>MATERIAL:</b>	Polypropylene
<b>COLOR:</b>	Black
<b>NOMINAL DIMENSIONS:</b>	2 ft x 4 ft x 0.5 in (0.6 m x 1.2 m x 1.3 cm)
<b>NOMINAL AREA:</b>	8 ft <sup>2</sup> (0.74 m <sup>2</sup> )
<b>NOMINAL WEIGHT:</b>	8 lbs (3.6 kg)
<b>OPEN AREA:</b>	55%
<b>MESH OPENING:</b>	0.75 in x 0.75 in (19 mm x 19 mm)
<b>MESH RIB WIDTH:</b>	0.25 in (6 mm) Connection: 4-sided tabular connection (screws or fasteners may be required)

Storage

## applications

### TURF PROTECTION APPLICATIONS

Light-to-medium weight equipment and vehicle access

- Landscape supply and construction
- General contractors
- Utility and cemetery

Pedestrian foot traffic at outdoor events, or in high-use areas

### OTHER APPLICATIONS

- Light-weight trail-hardening system over sand or soils
- Barrier free access across sandy areas and around playground equipment
- Storage surface for small trailers and boats, boxes or other items
- Deck/patio protection from falling debris at construction sites
- Garage/basement floor liner
